

At the Jena University Hospital (JUH), Clinic for Obstetrics (Director Prof. Dr. Ekkehard Schleußner), application are invited for a

Professorship for Obstetrics and Maternal Health (W2)

The successful candidate (m/f/d) should represent the field in research, teaching and medical services. UKJ is seeking a clinical and scientific expert in cardiovascular and metabolic diseases in pregnancy and the puerperium as well as in lifelong health of mothers and children. An outstanding expertise in translational research and in the conduct of clinical studies is expected. The appointee should strengthen the research focus "Aging and age-related diseases" of the Medical Faculty. This professorship is linked to the direction of the competence center for diabetes and pregnancy. For this reason a certification as diabetologist or equivalent qualification is requested.

Requirements include university degree in medicine, doctoral thesis, postdoctoral thesis (Habilitation) or equivalent scientific qualification, board certification of Gynaecology and Obstetrics and teaching skills. The candidate should have an outstanding track record in publications and extramurally funded research.

The JUH and Friedrich Schiller University Jena are committed to increasing the number of women in research and teaching. Therefore, JUH and the University actively encourage qualified female scientists to apply. In case of equal qualifications, applicants who have a disability will be favoured over the others.

Please submit complete application documents (CV, list of publications, list of lectures and courses taught, list of operations, copies of certificates and degrees, list of third-party funding) online at <https://berufungsportal.uniklinikum-jena.de> by **10.07.2020**, addressed to the Representative of the Dean of the Faculty of Medicine, Prof. Dr. Orlando Guntinas-Lichius. Please contact berufungen@med.uni-jena.de with any questions.
