

At the Jena University Hospital (JUH), Institute of Human Genetics (Director Prof. Dr. Christian Hübner), applications are invited for a

### **Professorship (W2 with tenure track to W3) for Cell Biology of Neurodegenerative Diseases**

The person (m/f/d) to be appointed will represent the subject in research and teaching. There is also the possibility to participate in medical services. It is expected that the appointee uses cellular and/or in vivo models for rare hereditary neurodegenerative diseases and strengthens the faculty's research foci.

Requirements include a university degree in a life science, postdoctoral thesis (Habilitation) or equivalent scientific qualification and teaching skills. The candidate should have an outstanding track record in publications and extramurally funded research.

The successful candidate will be employed for six years first. On a successful completion of the Tenure review after six years of employment, the position will be promoted to a professorship paid on salary scale W3 without additional selection procedure.

The JUH and Friedrich Schiller University Jena are committed to increasing the number of women in research and teaching. Therefore, JUH and the University actively encourage qualified female scientists to apply. In case of equal qualifications, applicants who have a disability will be favored over the others.

Please submit complete application documents (CV, list of publications, list of lectures and courses taught, copies of certificates and degrees, list of third-party funding) online at <https://berufungsportal.uniklinikum-jena.de> by 08.02.2020, addressed to the Vice Dean for Research of the Faculty of Medicine, Prof. Dr. Andreas Hochhaus. Please contact [berufungen@med.uni-jena.de](mailto:berufungen@med.uni-jena.de) with any questions.
